Wan 3.0 is not rated yet: the public boards usually score a new model within days, and its page on artificialwatch.com gains the scores then. The bench index is the median of each model's percentile across the public leaderboards that rate it (LMArena, LiveBench, SimpleBench, LLM Stats, Vals AI, Artificial Analysis).

Sources: price, limits for Wan 3.0 as the OpenRouter catalog lists it; the other models as their makers list them (models.dev); rankings from the ArtificialWatch Bench Index. Facts only: no forecast of ours, no claims from the lab's announcement.
